

**SFPE -
Society of Fire Protection Engineers
Mo-Kan Chapter
Scholarship**

The Mo-Kan Chapter will sponsor up to three merit scholarships for engineering students at the University of Kansas for the 2014-2015 academic year.

Purpose - to provide a mentoring relationship with a University of Kansas Engineering student (focus on Architectural Engineering) realizing the close proximity of the campus to the Mo-Kan Chapter's region. The scholarship will be based on academic accomplishments and faculty recommendations.

SFPE International's goals – One of SFPE's goals is to support fire protection engineering through academic institutions that educate future fire protection engineers through accredited engineering programs offering degrees in fields such as Mechanical, Electrical and Architectural Engineering.

Local goals – Benefits to our local chapter include interaction with the students and the ability to attract future hires to local fire protection firms; invitations to campus to speak to the faculty and staff; increased interaction with faculty and staff. SFPE support of the KU program compliments the stated goals of the KU School of Engineering to maintain a professional and academic presence in the KC area through continuing education and fund raising efforts.

Requirements for the scholarship applicant –

- Attendance at 2 chapter meetings, as class schedule allows, in the Kansas City Metro area during the year paid for by the local chapter; optional attendance at other educational opportunities that are offered in the region.
- The student will be encouraged to seek summer employment with a local fire protection engineering firm depending on availability of open positions.
- The student must have completed his/her second year of engineering school upon award of the scholarship.
- Submit cover letter and professional resume to Cindy Gier by email.

We invite all engineering students who meet the criteria to submit an application expressing interest and experience. Thank you.
